RESEARCH INTERESTS

Learning for autonomy with the goal of making multi-agent reinforcement learning seamlessly generalize across scenarios. Applications in planning for autonomous vehicles and sustainable cities. Past research on mathematical programming for combinatorial optimizations and natural language processing for information extraction.

EDUCATION

Massachusetts Institute of Technology, Cambridge, USA *Sep 2019-May 2025*
Ph.D. Electrical Engineering and Computer Science (GPA: 4.9/5.0)

Massachusetts Institute of Technology, Cambridge, USA *Sep 2019-Sep 2022*
M.S. Electrical Engineering and Computer Science (GPA: 4.9/5.0)

University of Moratuwa, Colombo, Sri Lanka *Mar 2014 -Dec 2017*
B.S. Computer Science and Engineering (GPA: 4.08/4.2)

RELEVANT EXPERIENCE

Massachusetts Institute of Technology, Cambridge, USA *Sep 2019-May 2025*
Ph.D. Candidate

- Work with Prof. Cathy Wu at Laboratory for Information and Decision Systems.
- Research on improving robustness and generalization in reinforcement learning, specifically when solving Contextual MDPs [1, R1].
- Model and build large-scale traffic simulations that span over ten major US cities and nearly three million traffic scenarios for impact assessment of cooperative eco-driving [W4, 6].
- Conduct computational studies validating the efficacy of reinforcement learning for eco-driving [2, W4], autonomous vehicle planning [3], and traffic smoothing [5].

Toyota Motor North America, Mountain View, USA *June 2023-Aug 2023*
Research Intern

- Worked with Dr. Yashar Farid and Mr. Kentaro Oguchi.
- Improved generalization in multi-agent reinforcement learning across scenarios by combining nominal-model-based policies with learning-based policies [R1].
- Conducted experiments to validate the effectiveness of the proposed method on eco-driving across 600 signalized intersections [R1].
- Proposed a hierarchical policy architecture aiming for continual learning for eco-driving across signalized intersections [R3].

University of Moratuwa, Colombo, Sri Lanka *Jan 2018-July 2019*
Research Assistant

- Worked with Dr. Shehan Perera and Dr. Uthayasankar Thayasivam.
- Conducted ride-sharing simulations with integer programming for request-driver matching.
- Conducted ride-pooling with meeting points simulations based on integer programming formulations for request-driver-meeting point matching.
- Analyzed the optimality gaps between heuristic methods and optimal methods for ride-pooling with meeting points problem [7].

Digital Mobility Solutions Lanka, Colombo, Sri Lanka *Jan 2018-July 2019*
Consultant Researcher

- Built numerical simulations of ride-sharing in major Sri Lankan cities based on real-world data.
- Evaluated the effectiveness of ride-sharing in select cities with large-scale numerical simulations.

Cornell University, Ithaca, USA *June 2018-Aug 2018*
Research Intern

- Worked with Prof. Samitha Samaranyake.
- Built an open source ride pooling simulator in C++ for large-scale ride pooling with integer programming based driver-passenger matching.
- Formulated Integer programming models for ride pooling with meeting points problem [7].

- Developed an open-source library Charon for SCIM 2.0 support following IETF specifications.
- Integrated SCIM 2.0 support for the WSO2 Identity server.
